TO THE
READER.

NOT without great Importunity, and that by the best of my Friends, have I been prevailed with to commit the following Piece to the Press, having at first designed it only for my own private Use; which was found by others to be so usefully expeditious in making up of Accompts betwixt Buyer and Seller, that frequent Sollicitations have been made to me to transcribe the same upon my own Terms; and have so often done it, that Lassitude has put me upon the Expence of exposing it by a

To the Reader.

more legible Character; chiefly because I could not answer the Demands of so many by Writing, as affected the Benefit thereof. And that it might in all respects answer the Ends of my Labour, for the benefit of Strangers as well as others, I have placed the Price distinctly over every column, and so fully amplified the Reduction of the coin of both Kingdoms, that whosoever is acquainted with the one, has herein a set rule for the other, for which he may (in the height of his Market) be securely guided without fear of error: And that time which heretofore has been lost by double and doubtfull castings, is hereby redeemable in time coming, with so much certainty of its infallible truth, that no Merchant, or other Trader need disquiet himself with the least of fears about it, provided always he guides his Eye right in finding the true Length, which is here so plain and easy by Directions prefix'd, that he that runs may read it. To such as have already had the Experience hereof, I need not say any thing; yet to the World I may boldly say this, it has made the Dull quick, the Weak resolve weighty Questions, and the Illiterate run parallel with him of great learning in managing of his Markets. As I am not ambitious of applause, so have I laboured to act above the dread

A true Description of the Usefulness of the following Table of Accompts ready cast up fitted to all Occasions in Buying or Selling of any Commodities whatsoever, whether by Number Weight, or Measure, Liquid or Dry

THE Table is composed of Price, Quantity and Value. each Page being divided into four Parts, two whereof are Scottish, and two Sterling, with their prefixed Denominations at the top of each Part.

The Price is in Scottish Money, beginning at one Shilling Scots, and rising gradually by a Bodle, [which is the sixth Part of one Penny Sterling] till it amounts to one Pound Scots.

Every Part is divided into four small Columns, the first Column, in the first and third Part of every Page, is the Number, the other three are the Value in Scottish Money, the second and fourth part of the Page is the same value in Sterling, the first, second, and third Columns, containing Pounds, Shillings, and Pence Sterling, the fourth is the Place of Boddles, and is marked at the top with *bo*.

Note. That all Numbers from 2 to 28, are to be found in the first Column in the left-hand Page, and from 29 to 55 in the third Column. The Numbers follow on in the right-hand Page, as from 56 to 82 in the first Column, and from 83 to 1000 in the third Column.

This Table is a necessary Companion for all Merchants in Buying or Selling, in either of both Kingdoms of Scotland or England, and may be applied to most uses in way of Commerce, in gain or Loss.

It resolves most usual Questions in the Golden Rule, or Rule of Three, and is of constant use for all Retailers that would keep just Accompts, making every Man that knows the value of a Figure, his own Book-keeper.

1st, find the Price of the Commodity, which is in Scottish Money at the top of each Page, then find the Quantity in the Column under *N^o*, and the Value follows in Scottish Money, & in the next Part directly opposite, you have the true Value in English Money, being marked above with Sterling,

but

20th or 1/8th is 1/12th part of

The Use of the following Table.

but if the Quantity you look for be 110, or 120, you must first find the one, and then the other, and by adding them together you have your desire, without danger of being mistaken.

As for Example. I desire to know what 130 Ells of Linen comes to at 17 s. 10 d. Scotish, I look in Page 204, where I find in the first Part the Price prefixed, 30 comes to 26 l. 15 s. and in Page 205, I find 100 comes to 89 l. 3 s. 4 d. which being easily added together, comes to 115 l. 18 s. 4 d. Scotish. And the like use is to be made of all other Parcels which are not comprehended intirely.

Another Example. I desire to know what 17 Ells of Cloth, at 17 s. 2 d. Scotish comes to, I look on Page 196, and under N^o I find 17, and in a direct Line to the right hand I find 14 l. 11 s. 10 d. Scotish, and in the next part under the Title Sterling, I find the Value in English Money, which is 1 l. 4 s. 3 d. 5 bo. or five six parts of a Penny.

And likewise of all other Questions, you have a true Resolution readily found out, And for your Information, I would know what 50 Ells of Cloth at 21 s. Scotish comes to, I look in the Table, and find no Price so high. For Resolution whereof, and all other of the like nature, you must take half the Price, which is 10 s. 6 d. and find that as before, which being doubled, makes 52 l. 10 s. Scotish, and is in English 4 l. 7 s. 6 d.

And that I may yet shorten your way, take this following Direction, If you will suppose any of the Prices which have the Title of Scotish at the top to be English Money, and you will find it to be according to your desire exactly right. One thing more I will offer to your Consideration, At 19 s. the Gallon, what is a Tun worth, reckoning 252 Gallons to the Tun, I find 52 to be worth 49 l. 8 s. 0 d. and the 200 which makes up the Tun, 190 l. 0 s. 0 d. in all 239 l. 8 s. 0 d. Scotish, in English 4 l. 2 s. 4 d. and 15 l. 16 s. 8 d. being 19 l. 19 s. 0 d. Sterling. But these, instead of thousands of Examples I could give, shall suffice.

a Pound B Sterling The

Doulton, Wednesday before Lady day. Yarme, Thursday before Lady day. Newark, Tuesday seven-night before Palm-Sunday. Thursday before Palm-Sunday, at Llandissel. Palm-Sunday Even, at Alisbury, Leicester, Newport, Skipton and Wisbich.

Palm-Sunday, at Billingsworth and Kendal. Tuesday after, at Wakefield. Monday before Easter at Ludby. Tuesday, at Selby. Mond. Tues. and Wednesday, at Marsh and Ludlow. Monday before St. John Baptist, at Soham. St.

246. *The Names of the Principal Fairs*

Peter and St. Paul, at Rudbury. Monday in Easter-week, and Monday before St. Thomas, at Thornbury. Good-Friday, at Acton, Burnel, Amptil, Brewton, Berry, Charing, Enfield, Gifford, Guntington, Hatfield, Risbrough, St. Pombes and Ipswich. Easter-Monday, Dryford, at Gainsborough and Onoy in Bucks. Easter-Tuesday, at Ashby De-la-zouch. Bralies, Daintry, Dorchester, Hitching, Northstreet and Rochford. Easter Wednesday, at Beverly and Wellingborough. Friday in Easter-week, at Darby. Saturday, at Skipton in Craven. Monday, Tuesday and Wednesday after Easter, at Chudleigh, and at Hareford the same Wednesday. Monday after Low-Sunday, at Bricklesworth, Evesham and Newcastle under Line. In Rogation week, at Beverly and Englefield. Enmore-Green the first Tuesday in every Month. Greenstreet on Tuesday before Ascension. On Ascension day, Bewmaris, Bradsted in Kent, Birmingham, Burton on Trent, Chappel-Frith, St. Edes, Egglestrew, Hallaton Kidderminster, Lutterworth, Middlewich, Newbury, Newcastle, Rippon, Stopport, Stratford, Sudminster, Vizes, Wiggan, and Yarm. Sunday after Ascension day, at Burlington. Wednesday after Ascension day, at Shrewsbury. Whitsunday-Even, at Skipton and Wisbich. Whitsunday at Cribby, Ratfdale, Ryhil and Salisbury. Whitsun Monday, at Kingston, Bramyard. Whitsun Tuesday, at Hampton in Norfolk, Ashby-de-la-zouch, Canterbury, Epping, Knotsford, Leighton, Melton, Midhurst, Monmouth, Ormystock, Perith and Rockford. Wednesday in Whitsun week, at Llanbedon, Leek, Newark on Trent, Pont-stephen and Royston. Thursday in Whitsun Week, at St. Austel, Cakefield and Kingston. Friday in Whitsun Week, at Cogshal, Derby, Stow, Trinity Eve, Rowel and Skipton in Craven. Sunday at St. Mary Awk, Kendal, Rowel and Stokely. Monday, at Hundflow, Raleigh, Creswel, Spilsby, Tunbridge, Vizes and Watford. Tuesday after Trinity, at Abergavenny and Radnor. Corpus-Christi-day, at Sanbury, St. Anns, Bishopstratford, Berminham, Egglestrew, Hallaton, Haligh, Hempstead, Kedderminster, Newbury, Newport in Montgomery. and Stopport. Friday after, at Chepstow and Coventry. Sunday after, at Bolton and Stamford. Sunday fort-

night after Midsummer, at Foddringhay. First Sunday after St. Bartholomew, at Ashford. Thursday before St. Michael, at Kettering. Monday after, at St. Fiths by Norwich.

Tuesday, at Salisbury. Thursday, at Banbury. Friday before St. Simon and Jude, at Litchfield. Thursday before St. Thomas, at Ketterling.

Mr. Street's Memorial VERSES, for the Ecclesiastical and Civil KALENDER.

To know if it be Leap-Year.

Divide the Year by 4; what's left shall be,
For Leap-Year 0. for past 1, 2 or 3.

Example. Anno Dom. 1711. Omitting the 100's, and also the 20's if there be any; I Divide the residue, which is 11 by 4, and the remainder is 3; which shews it is the second after Leap-Year.

To find the Dominical Letter.

Divide the Year it's 4th, and 4 by 7,
What's left, substraſt from 7, the Letters given.

A 1 B 2. C 3 D 4. E 5. F 6. G 7.

<i>Example.</i> The Year of Christ	---	---	4/1710. - 2
The 4th part (omitting the Fraction) is	---	---	427-
To both which add the number 4.	---	---	4.
The sum is,	---	---	2141.

Which Divided by 7, the remainder is 6, which Subtracted from 7, there is left 1; which shews that the Dominical Letter for the Year 1710, is the first in the order of the Alphabet that is, A.

But the Leap-Year hath two Dominical Letters, the latter found by this Rule, serveth from St Matthias's day, to the Years end, and for finding Easter: The former, next following in order from A. to G. and beginning again at A. serveth from New-Year, to St. Matthias.

For the Golden-Number, Cycle of the Sun and Indiction,
When 1, 9, 3, 10th Year hath added been,
Divide by 19, 28, 15

Example To 1710 I add 1, the sum 1711. I Divide by 19 and there remaineth 1, which is the Golden-Number for the Year 1710. Again to 1710 I add 9, and the sum 1719, I Divide by 28 the residue, 11 is the Cycle of the Sun Anno. 1710. Lastly, to 1710 I add 3, the sum 1713 Divided by 15, the remainder 3 is the Indiction for 1710

The Prime, or Golden-Number given to find the Epact.

Divide by 3, for each one left add Ten
30 reject, the Prime makes Epact then.

Example Anno. 171 the Golden-Number is 1, which Divided by 3, there is left 1; therefore ten times 1 is 10, which added to 1, the Golden Number. the sum is 11, the Epact for the Year 1710.

By the 19 Epacts to find the Day of Easter, Limite from the beginning of March inclusively.

The Epacts take from 57, but 2.
The greatest take from 77, it will do.

Example. Anno, 1710 The Epact being 11, I Subtract it from 57, and the residue 36 is Easter Limite. Anno. 1710, that is April the 5th, reckoning from the beginning of March inclusively.

But when the Epact is 28 or 29 it must be Subtracted from 77, that so the Limite may remain; and the next following Sunday after the Limite is always Easter-Day.

Easter Limite & the Dominical Letter being given; to find Easter day.

The Letter more by 4, from Limite take;

What's left from nearest sevens, shall Easter make.

Or Thus; Take the Number of the given Letter more by 4; from the given Limite. and the Residue from the nearest greater Sum of sevens: The last Remainder added to the Limite, the Sum or it's Excess above 31, is Easter Day, in March or April.

Example. Anno 1710 the Letter A, or 1, more by 4 is 5, which taken from the Limite 36, the Residue is 31; This taken from the nearest greater Sum of Sevens viz. 35, there remaineth 4, which added to the Limite 36; the Sum is 40 the Excess of which above 31 is 9; Therefore the 9th of April, Anno 1710 is Easter-Day.

For the Age of the Moon, or the Day of Change.

Janus 0, 2, 1, 2, 3, 4, 5, 6.

8, 10, 10, these to the Epact fix,

The Sum (bate 30) to the Month Day add

Or take from 30: Age or Change is had.

Jan. Feb. Mar. Apr. May. Jun. July. Aug. Sep. Oct. Nov. Dec.

0, 2, 1, 2, 3, 4, 5, 6, 8, 8, 10, 10.

The Sum if it be less than 30: Or else the Excess above 30; added to the Day of the given Month (rejecting 30, if need be) gives the Age of the Moon that day; but subtracted from 30, leaves the day of the Change in (or from the beginning of) that Month.

For day of the Full-Moon, add or subtract 15, to or from the day of the change.

Example. 1st. For the age of the Moon, Anno 1710 Feb. 16 the number of the Month 2, added to the Epact 11, makes 13; which added to 16 (rejecting 30 if need be) the sum is 29 the Moons age req.

2d. For the day of the change or New-Moon, in Feb. 1710. The Epact 11 with the Month 2; makes 13 (as afore,) which subtracted from 30, the residue is 17, the day of the New-Moon in Feb, 1710.

3d. The Sum of 17 & 15 is 32, subtract 30 gives, 2, the day of the Full Moon in Feb, 1710; or from 17 take 15, and the remainder shews the same thing.

To find the hour of the Moons coming to South, and high-water at London.

The Moons Age Multiplied by 4, divide

By 5 for Southing: Add 3 for the Tyde;

But when the Age of the Moon exceeds 15, you may reject 15; as in this *Example.*

Anno, 1710 Feb. 16 the age of the Moon being 29 days, I reject 15, and the residue 14, Multiplied by 4, makes 56, which divided by 5, the Quotient is 11 one fifth the hour of the Moons Southing: To which add 3 hours and the Sum is 14 one fifth or 2 one 5th Afternoon, the hour of high Sea at London.

FINIS.

Archibald Gray

$$\begin{array}{r} 20 \\ 12 \\ \hline 40 \\ 20 \\ \hline 240 \end{array}$$

15. 9

$$\begin{array}{r} 11-6 \\ 16 \quad 0 \quad 6 \\ \hline \end{array}$$

$$\begin{array}{r} 20 \overline{) 240} (12 \\ \underline{20} \\ 40 \\ \underline{40} \\ 0 \end{array}$$

True

A Shilling is the
 $\frac{1}{20}$ part of a pound
 $\frac{1}{8}$ or 20 is the 12th
 part of a Pound Sterling
 240 is a Pounds Sterling
 where 12 is $\frac{1}{20}$ the 20th $\frac{1}{12}$ is
 $\frac{1}{2}$ of a Scotch or 10th or
 $\frac{1}{12}$ is $\frac{1}{2}$ of 12 shillings
 of a year 240th month is 12
 20 is $\frac{1}{12}$ of 1st shilling

Example. Anno, 1710 The Epact being 11, I Subſtract it from 57, and the reſidue 36 is Eaſter Limite. Anno. 1710, that is April the 5th, reckoning from the beginning of March incluſively.

But when the Epact is 28 or 29 it muſt be Subſtracted from 77, that ſo the Limite may remain; and the next following Sunday after the Limite is always Eaſter-Day.

Eaſter Limite & the Dominical Letter being given; to find Eaſter day.

The Letter more by 4, from Limite take;

What's left from neareſt ſevens, ſhall Eaſter make.

Or Thus; Take the Number of the given Letter more by 4; from the given Limite and the Reſidue from the neareſt greater Sum of ſevens: The laſt Remainder added to the Limite, the Sum or it's Exceſs above 31, is Eaſter Day, in March or April.

Example. Anno 1710 the Letter A, or 1, more by 4 is 5, which taken from the Limite 36, the Reſidue is 31; This taken from the neareſt greater Sum of ſevens viz. 35, there remaineth 4, which added to the Limite 36, the Sum is 40 the Exceſs of which above 31 is 9; Therefore the 9th of April, Anno 1710 is Eaſter-Day.

For the Age of the Moon, or the Day of Change.

J. nus 0, 2, 1, 2, 3, 4, 5, 6.

8, 8, 10, 10, theſe to the Epact fix,

The Sum (bare 30) to the Month Day add

Or take from 30: Age or Change is had.

Jan. Feb. Mar. Apr. May. Jun. July. Aug. Sep. Oct. Nov. Dec.

0, 2, 1, 2, 3, 4, 5, 6, 8, 8, 10, 10.

The Sum if it be leſs than 30: Or elſe the Exceſs above 30; added to the Day of the given Month (rejecting 30, if need be) gives the Age of the Moon that day; but ſubſtracted from 30, leaves the day of the Change in (or from the beginning of) that Month.

F day of the Full-Moon, add or ſubſtract 15, to or from the day of the change.

Example. 1^{ſt}. For the age of the Moon, Anno 1710 Feb. 16 the number of the Month 2 added to the Epact 11, makes 13; which added to 16 (rejecting 30 if need be) the ſum is 29 the Moons age req.

2^d. For the day of the change or New-Moon, in Feb. 1710. The Epact 11 with the Month 2; makes 13 (as afore,) which ſubſtracted from 30, the reſidue is 17, the day of the New-Moon in Feb, 1710

3^d. The Sum of 17 & 15 is 32, ſubſtract 30 gives, 2, the day of the Full Moon in Feb, 1710; or from 17 take 15, and the remainder ſhews the ſame thing.

To find the hour of the Moons coming to South,

and high-water at London.

The Moons Age Multiplied by 4, divide

By 5 for Southing: Add 3 for the Tyde;

But when the Age of the Moon exceeds 15, you may reject 15; as in

this *Example.*
Anno, 1710 Feb. 16 the age of the Moon being 29 days, I reject 15, and the reſidue 14, Multiplied by 4, makes 56, which divided by 5, the Quotient is 11 one fifth the hour of the Moons Southing: To which add 3 hours and the Sum is 14 one fifth or 2 one 5th Afternoon, the hour of full Sea at London.
